SUMMARY

Experienced Software Developer with **5 years of experience in Agile environments** building and maintaining SaaS products. Skilled in REST API design, feature development, database optimization, system performance improvement, and defect resolution. Strong focus on clean code, design patterns, TDD, and system design.

SKILLS SUMMARY

Languages: Ruby, Java, Python	Frameworks: Ruby on Rails, Django, Spring Boot
Database: MySQL, PostgreSQL, Redis, Elasticsearch	Cloud: AWS
Tools: ChatGPT, GitHub Copilot, Claude, Cursor, Git, JIRA	Frontend: JavaScript, Stimulus JS, Hotwire, Turbo Streams, jQuery, Bootstrap

EXPERIENCE

- Riskconnect** Bengaluru, IN
Software Engineer - Business Continuity and Resilience Oct 2024 - Present
 - Engineered a **real-time approval PDF pipeline** using **Action Cable and Turbo Streams**, streaming live status updates to users, eliminating manual page refreshes, and **reducing PDF availability latency by 90% (30s to < 3s)**.
 - Redesigned the document section architecture using a **N-ary tree data structure and DFS-based traversal**, enabling nested parent-child sections to load on demand via Turbo and **reducing initial load time by 60-70%**.
 - Eliminated major backend defects and **optimized N+1 queries**, while also fixing UI-level issues using Stimulus JS to **streamline document rendering and improve responsiveness**.
 - Enhanced software quality through **root-cause-driven defect resolution** and expanded automated test coverage, **reducing recurring production issues** and decreasing new defect reports by 10 per week.
 - Tech Stack:** Ruby on Rails, Stimulus JS, Hotwire, Turbo Streams, Javascript, jQuery, PostgreSQL, Bootstrap, Redis, ElasticSearch, React, Rspec.
- ACNJ Technologies (Finvisage)** Bengaluru, IN
Software Developer - Asset Liability Management Sept 2022 - Sept 2024
 - Reduced **manual effort by 40-50%** by creating a **Python microservice** for real-time **Mutual Fund market tracking** through **web scraping** and streamlining **automated daily updates** via a **cron job**.
 - Implemented a **caching strategy** with **Redis**, cutting down **page load times** by an average of 30%.
 - Engineered **financial transparency** and **withdrawal limit** management through **personalised dashboards**, resulting in a 23% increase in efficiency and data accessibility.
 - Mentored** and coached 2 interns and **junior developers** in best **coding practices**.
 - Tech Stack:** Ruby on Rails, Python, Javascript, jQuery, HTML, CSS, Bootstrap, PostgreSQL, Redis and AWS.
- Edubrite Systems (Acquired by LinkedIn)** Pune, IN
Full Stack Developer - Learning Management System (Product) June 2021 - Aug 2022
 - Revamped the video player platform by **implementing chapter and timestamp features**, leading to a **20% improvement in content navigation** efficiency and user interaction.
 - Created **interactive web pages** with Velocity and JavaScript, boosting user engagement by 30% and **enhancing cross-device usability**.
 - Upgraded LMS product functionality by developing **in-house features**, resulting in a 30% reduction in **user-reported issues** and a 20% increase in **user engagement**.
 - Streamlined **application performance** by implementing **web optimization techniques** like **caching, lazy loading, and code splitting**, resulting in a 30% decrease in **page load times** and an **elevated user experience**.
 - Tech Stack:** JAVA, Spring Boot, Velocity, JavaScript, jQuery, HTML, CSS, Bootstrap, MySQL.

EDUCATION

- National Institute of Science and Technology** CGPA: 9.1
Bachelor of Technology - Computer Science Engineering June 2017 - June 2021
